## SUMMARY

BSc from the Department of Engineering Informatics of the Technological and Educational Institute of Central Macedonia, Greece. Two years of professional experience working on e-commerce platforms (Opencart etc.) focused on readable, supportable and quality code. I am a strong supporter of open source platforms where I have contributed in my free time working in parallel with many other people. Also I have an interest in data privacy and security. I learn quickly and work well in a dynamic and high paced environment.

## EDUCATION

### BCs in Engineering Informatics

#### Technological and Educational Institute of Central Macedonia

##### GRADUATE

- Thesis titled «Study of the Intelligent Water Drops optimization algorithm and its application in solving practical optimization problems» for which I studied the *Intelligent Water Drops* algorithm and developed a console and GUI application for the solution of the *Traveling Salesman Problem*.

## WORK EXPERIENCE

### Software Developer (Backend) | Freelancer

2015 – TODAY

Collaboration with e-commerce sites (seasonal items / gift shops, clothes, online delivery sites, etc.). Development of solutions for :

- Online payments
